ErJobPortal – POD.ai Feature Gap Report

Features publicly described by POD.ai that are missing or incomplete in the current ErJobPortal project

Prepared: 06 October 2026

1. Executive Summary

This report identifies capabilities publicly described by POD.ai that are not currently present as complete modules in ErJobPortal, based on the ErJobPortal modules and code discussed during development. It intentionally does not list new/differentiating ideas yet. The purpose is to establish a clean POD-to-ErJobPortal gap list before adding new features.

2. Important Current Strengths of ErJobPortal

- Candidate registration/login and candidate profile
- Candidate code and profile routing
- Candidate skills, languages and career objective
- Organization registration/login and organization profile
- Organization posts/jobs
- Candidate applications and applied-post tracking
- Organization applicant/selection workflow
- Selected-trainee management
- Resume/profile viewing and multiple profile layouts
- Resume builder
- Candidate, Organization and SuperAdmin dashboards
- Charts/analytics foundation
- Candidate job matching foundation
- SuperAdmin administration
- TPO module is being developed

3. POD.ai Capabilities Missing or Incomplete in ErJobPortal

#	POD.ai capability	Gap in ErJobPortal	Priority
1	Recruitment Drive Management	POD describes an end-to-end campus recruitment drive workflow. ErJobPortal currently has posts/applications/selection, but no complete Recruitment Drive entity and lifecycle.	HIGH
2	Assessment / Pre-placement Tests	POD describes assessment tests used to screen candidates before interviews. ErJobPortal does not currently have a complete online assessment engine.	HIGH
3	Question Bank	POD describes custom/standard question banks and skill-specific	HIGH

		questions. ErJobPortal currently has no complete question-bank module.	
4	Assessment Evaluation / Correction	POD describes assessment correction and storing assessment scores for recruitment decisions. ErJobPortal has no complete assessment evaluation/result workflow.	HIGH
5	Interview Scheduling	POD describes assigning interviews and interview schedules. ErJobPortal does not currently have a complete interview scheduling module.	HIGH
6	Interview Panel / Interviewer Assignment	POD describes interview panels and interviewer assignment. ErJobPortal does not currently have a complete interviewer/panel module.	HIGH
7	Interview Feedback	POD describes recording interview feedback and making it available to later interview panels. ErJobPortal does not currently have a complete interview-feedback workflow.	HIGH
8	Multiple Interview Rounds	POD describes multiple assessment/interview rounds. ErJobPortal currently does not have a formal configurable multi-round recruitment engine.	HIGH
9	Candidate Recruitment Pipeline	POD supports tracking candidates through recruitment stages. ErJobPortal has application/selection states but not a full configurable pipeline such as Applied → Assessment → Shortlisted → Interview → Selected → Offer.	HIGH
10	Grade Normalization	POD explicitly describes normalization of grades across colleges with different grading systems. ErJobPortal does not currently have this feature.	MEDIUM
11	Advanced College/Candidate Sourcing for Employers	POD describes helping employers identify suitable colleges based on required skills and expanding the talent pool beyond their usual reach. ErJobPortal does not currently have a dedicated employer	MEDIUM

		college-sourcing/recommendation engine.	
12	Real-time Recruitment Drive Tracking	POD describes live tracking of interviews and recruitment-drive progress. ErJobPortal has dashboards, but no dedicated real-time drive-tracking module.	MEDIUM
13	Placement Notifications	POD describes prompt notifications for companies, assessment rounds, scores/progress, interviewers, time, venue and selection status. ErJobPortal does not currently have a comprehensive centralized placement-notification engine.	HIGH
14	Student–TPO–Alumni Communication Platform	POD describes a communication/knowledge-sharing platform where students, TPOs and alumni can interact, ask questions and share placement information. ErJobPortal does not currently have this complete communication ecosystem.	MEDIUM
15	Alumni Portal / Alumni Network	POD describes an alumni portal and using alumni relationships for mentoring and routing employment opportunities. ErJobPortal currently has no dedicated Alumni module.	MEDIUM
16	Placement Performance Analytics for TPO	POD describes TPO analytics covering companies, eligible students, selections, accepted offers and packages. ErJobPortal has dashboard/chart foundations but not this complete placement analytics/reporting layer.	MEDIUM
17	Offer Acceptance Tracking	POD describes tracking selected students, offer letters and accepted offers. ErJobPortal currently reaches selection but does not have a complete offer/acceptance lifecycle.	HIGH
18	Onboarding / Joining Tracking	POD describes recruitment through offer/onboarding stages. ErJobPortal does not currently have a complete	MEDIUM

		joining/onboarding module.	
19	Company/College/Candidate Shared Recruitment Data	POD positions itself as a single platform where recruitment data, student records, scores and feedback are shared across stakeholders. ErJobPortal has separate role modules but lacks the full shared recruitment-drive data layer.	MEDIUM
20	Employer-side Historical Candidate/Drive Intelligence	POD describes retaining previous candidate scores and feedback and using historical information during recruitment. ErJobPortal does not currently have a dedicated historical recruitment intelligence module.	MEDIUM

4. Highest Priority Build Order

1. Recruitment Drive module
2. Assessment module
3. Question Bank
4. Assessment Result/Evaluation
5. Interview Scheduling
6. Interview Rounds + Interviewer/Panel
7. Interview Feedback
8. Candidate Recruitment Pipeline
9. Offer + Offer Acceptance
10. Placement Notifications
11. TPO/College Placement Analytics
12. Alumni module

5. Recommended Recruitment Drive Lifecycle

Organization → Recruitment Drive → Job/Post → Eligibility → Candidate Registration → Assessment → Shortlist → Interview Round 1 → Interview Round 2 → Final Selection → Offer → Offer Acceptance → Joining → Placement Analytics

6. POD.ai Evidence Used

- POD home page: POD describes a career-development platform bringing academia, companies, students and alumni together.
- POD – campus recruitment structure: Describes a single platform for student/college data, grade normalization, custom/standard assessments, screening and recruitment-drive support.
- POD – talent pool: Describes candidate data, interview assignment/scheduling, live interview tracking, interview feedback and assessments.
- POD – TPO platform: Describes notifications, performance/data analysis, reports, student progress and student/alumni/TPO knowledge sharing.
- POD – question bank: Describes customized skill-specific question banks for assessment and screening.

- POD – interview feedback: Describes recording feedback across multiple interview rounds for later interview panels.

Note: The POD.ai sources used here are public POD.ai pages. Some are older articles, so this report treats them as publicly documented capabilities rather than a guarantee that every capability is currently packaged or sold in exactly the same way today.

7. Conclusion

ErJobPortal already contains the core Candidate–Organization–Post–Application–Selection foundation. The largest POD.ai gaps are the recruitment-drive layer, assessment/question-bank system, interview scheduling and feedback, complete candidate pipeline, notifications, offer/onboarding tracking, alumni/communication, grade normalization and advanced placement analytics. These should be completed before adding new differentiating features.
